FEATURES AND BENEFITS

- Seamless and flush aesthetic creates a visually clean cabinet and light installation when ganged with M Series Reserve, M Series, PL PORTRAY and PL Series medicine cabinets

- Light provides ambient lighting for a room with a soft glow that envelops a space and onto the wall with enough light to function and provides a consistent level of lighting
- Warm, relaxing tones (3000K) that replicate indoor lighting
- Remarkably accurate color rendering with a CRI value of 90+ and R9 of 50+. An R9 value of 50+ in conjunction with a CRI of 90+ is needed to accurately render colors, bring out skin tones and accurately match makeup to skin tone
- Thinner profile with Edgeline is ideal for urban spaces with a style that is reversible (rotate light pattern inside or outside) for ease of installation
- Ease of installation: build the lighting and cabinet configuration prior to placing in the wall using keyhole installation brackets and quick plug-in wire connectors, making installation a cinch
- Dimmable LED to add ambiance and can be used as a night light to allow for wayfinding at night for safe trips to the bathroom, using most standard residential dimmer that works with your home's existing wiring
- Will operate in high humidity or damp spaces. ETL certified to UL 1598 CSA Standard C22.2 No. 250.0

CONSTRUCTION

- Durable rust-free anodized aluminum and glass construction - glass resists intense moisture, ensuring long-lasting beauty
- Anodized aluminum back frame
- Quality polished edge mirror
- Diffuser built into the product eliminating the need for plastic diffusers to be purchased separately, reducing eye strain with no dark/hot spots.
- Fully encased lighting construction eliminating exposed LEDs and electrical components
- Salt Spray Testing - ASTM Standard for 300 hours performed to test mirror quality against desilvering and degradation resulting from environmental exposure

- Plumbing drawer to allow clearance for drain (not available for 12" W drawer); false fronts (7-1/2" height - H1 only, not available for 12" W drawer) maintain the vanity's design when a sink does not allow room for a drawer; tip out drawer (7-1/2" height - H1 only, not available for 12" W drawer) gives storage back by providing a drawer for smaller items and full drawer allows optimal storage solutions; full drawers are not designed to accept a sink or plumbing. CONSTRUCTION

- Durable rust-free anodized aluminum and glass construction - resists intense moisture, ensuring long-lasting beauty

PROFILES® VANITIES

- Slow-close full-extension slides combined with the durability of aluminum construction ensure smooth operation of the vanity drawers that will last a lifetime
- Constructed for wall hanging loads with stone tops
- Glass fronts and side kits are replaceable
- Industrial grade installation hardware
- White shatter-protected glass drawer bottoms will not degrade or show wear. Glass dissipates heat to ensure confidence that hot items will not leave heat marks on the bottom of the drawers

and only available for 15" H (H2) vanities (not available for 12" W vanities)

INSTALLATION

- This installation may require more than one person
- Includes installation hardware and structural bolts
- Special site preparation is required. Wall bracing and Robern supplied hardware are recommended.
- The plumbing must be roughed into the plumbing cutout area of the vanity. Refer to the sink rough-in and the vanity rough-in for proper placement. The water supply and drain lines must be installed before installing the vanity.
- Components needed for stacking are included with each vanity
- Within a column, all vanities must stay the same width. Ganging kit required for each column connection point and is selected based on the connection height of the cabinets. Each ganging kit is by 7-1/2" H increments (H1 = 7-1/2", H2 = 15", H3 = 22-1/2", H4 = 30").
- Side kits are sold separately to allow for customization and are available individually or as pairs. You must choose one side kit or alcove kit for every exposed side
- With a 7-1/2" H vanity, a tip out drawer must be used with an undercounter sink
- If stacking with a 7-1/2" H tip out drawer, the second vanity must be a 7-1/2" plumbing drawer, a 15" plumbing drawer or a 15" H full drawer as the first 15" H needs plumbing clearance. If using 7-1/2" H tip out for undercounter sink installation, slim plumbing drawer insert can be used with a 15" H plumbing drawer and still clear pipes.
- Night light option (S) - 12VDC plug-in transformer. Option of two color temperatures for one night light: 2700 or 4000 Kelvin. The vanity is preconfigured at 2700K. Night light can be reconfigured to 4000K at time of installation, See installation instructions for more information.
- Electric Accessory option: three plugs and a switch that turns off power to the unit to keep appliances safely plugged in - 120VAC 20A outlet - GFCI protected. Installed within 15" H (H2) vanity drawer; not recommended to be used in combination with Drawer Insert
- Plumbing drawer insert must be used with an above-counter sink installation; full drawer version can be used in a full drawer - includes four glass bins

FEATURES & BENEFITS

- Offered in limitless designs, these vanities are built to fit your preference and storage needs
- Modular vanities can be ganged or stacked to fit a variety of desired heights and widths (ganging kit required)
- Plumbing drawer to allow clearance for drain (not available for 12" W drawer); false fronts (7-1/2" height - H1 only, not available for 12" W drawer) maintain the vanity's design when a sink does not allow room for a drawer; tip out drawer (7-1/2" height - H1 only, not available for 12" W drawer) gives storage back by providing a drawer for smaller items and full drawer allows optimal storage solutions; full drawers are not designed to accept a sink or plumbing. Drawers are intended for ganging and stacking
- Uniquely designed handleless ergonomic drawer, allows for a comfortable feel and effortless operation
- H1 (7-1/2") vanities include five glass bins for plumbing drawers and four glass bins for full drawers; H2 (15") vanities include one glass bin with plumbing drawers; not available for 12" W vanities
- Organization kit for H2 (15" H): two fully adjustable glass drawer dividers provide storage right where you need it and prevent items from moving and sliding in the drawer
- Night Light Option - integrated LED night light with light bar built into top frame of each drawer, provides soft light to illuminate drawer interior and for wayfinding light in selectable 2700 Kelvin/4000 Kelvin. Night light is ETL certified to UL 2108, CSA Standard C22.2 No. 12

CARTESIAN® VANITIES

CONSTRUCTION

- Durable rust-free anodized aluminum and glass construction - resists intense moisture, ensuring long-lasting beauty
- Slow-close full-extension slides combined with the durability of aluminum construction ensure smooth operation of the vanity drawers that will last a lifetime
- Constructed for wall hanging loads with stone tops
- Glass fronts and side kits are replaceable
- White shatter-protected glass drawer bottoms will not degrade or show wear. Glass dissipates heat to ensure confidence that hot items will not leave heat marks on the bottom of the drawers

INSTALLATION

- This installation may require more than one person
- Includes installation hardware and structural bolts
- Special site preparation is required. Wall bracing and Robern supplied hardware are recommended
- The plumbing must be roughed into the plumbing cutout area of the vanity. Refer to the sink rough-in and the vanity rough-in for proper placement. The water supply and drain lines must be installed before installing the vanity
- Components needed for stacking are included with each vanity
- Within a column, all vanities must stay the same width. Ganging kit required for each column connection point and is selected based on the connection height of the vanities. Each ganging kit is by 7-1/2" increments (H1 = 7-1/2", H2 = 15", H3 = 22-1/2", H4 = 30").
- Side kits are sold separately to allow for customization and are available individually or as pairs. You must choose one side kit or alcove kit for every exposed side
- Alcove finishing kits are required for corner or alcove installations
- With a 7-1/2" H vanity, a tip out drawer must be used with an undercounter sink
- If stacking with a 7-1/2" tip out drawer, the second vanity must be a 7-1/2" plumbing drawer, a 15" plumbing drawer or a 15" full drawer as the first 15" needs plumbing clearance. If using 7-1/2" tip out for undercounter sink installation, slim plumbing drawer insert can be used with a 15" H plumbing drawer and still clear pipes
- Night light option (S) - 12VDC plug-in transformer. Option of two color temperatures for one night light: 2700 or 4000 Kelvin. The vanity is preconfigured at 2700K. Night light can be reconfigured to 4000K at time of installation, See installation instructions for more information.
- Electric Accessory option: three plugs and a switch that turns off power

to the unit to keep appliances safely plugged in - 120VAC 20A outlet - GFCI protected. Installed within 15" H (H2) vanity drawer; not recommended to be used in combination with Drawer Insert

- Plumbing drawer insert must be used with an above-counter sink installation; full drawer version can be used in a full drawer - includes four glass bins and only available for 15" H (H2) vanities

WARRANTY/TERMS AND CONDITIONS/CARE AND CLEANING

LIMITED WARRANTY, ONE-YEAR TERM

Robern warrants to the original purchaser that it will, at its election, repair, replace, or make appropriate adjustment to products made by this company shown to have significant defects in material or workmanship which are reported to Robern in writing within one (1) year from the date of delivery. Robern is not responsible for installation costs.

The warranty time period for operating components including door hinges and opening devices to the original owner extends beyond the one-year term.

The warranty is void in the event the product is damaged in transit, or if damage or failure is caused by abuse, misuse, abnormal usage, faulty installation, damage in an accident, improper maintenance, or any repairs other than those authorized by Robern. At the expiration of the one-year warranty period, Robern shall be under no further obligation under any warranty, expressed or implied, including the implied warranty of merchantability.

CARE AND CLEANING

For best results, keep the following in mind when caring for your Robern product:

Aluminum and Glass

- Blot spills immediately with a soft, damp cloth.
- Test cleaners in a discrete location first, such as the inside of a door, to ensure that there is no adverse reaction.
- Ammonia or vinegar-based cleaners can damage mirrors. Do not use abrasive cleansers.
- A 50/50 solution of water and isopropyl alcohol is recommended for cleaning medicine cabinets and mirrors.
- When cleaning, spray the cloth, not the mirror or surround surfaces.

Wood

- Do not expose wood furniture to direct sunlight, drying heat sources, or dampness.
- Protect wood surfaces by using felt, leather or cork under accessories. Never slide objects across wood surfaces.
- Dust frequently with a soft cloth in the direction of the grain.
- Use only products specifically made for cleaning wood. Avoid using oily polishes or waxes, or products containing silicone.
- Every six months, remove soil buildup by rubbing with a soft cloth dampened in a 50/50 solution of warm water and an ammonia-free detergent. Wipe clean with a cloth dampened in warm water. Wipe dry.
- Paint pens and touch-up markers may be available to conceal scratches on the wood surface. These products may be purchased from a Robern distributor or call 1-800-877-2376 for ordering information.
